

**Guiding Principles in Scoring Applications Submitted
For the 2016 HCCSC Local Competition for CoC Grant Funds**

- 1. A renewal project that is converting or has recently converted to a new project type will be scored based on the original project's performance to the extent the same performance criteria are applicable to the new project.**
- 2. Renewal projects that have not yet begun or have not yet submitted an APR will be scored based only on the renewal criteria for which data is available.**
- 3. A project will not be credited with having met minimum leverage requirements unless it has specified qualified types and sources of leverage with a dollar value at least 1.5 times the amount of the CoC grant it is requesting or unless the organization operating the project has other projects applying for CoC grants that have sufficient excess leverage to compensate for the project's shortfall.**
- 4. In determining "Housing Stability," using Q. 36 on the APR, the actual number of persons applicable to the housing stability measure will include persons whose destination was unknown at the time of their departure.**
- 5. The Recipient Approval and Evaluation Committee will use its discretion to adjust a score for performance-based criteria where the score is unusually high or low due to the fact that it is based on the outcomes for only one or two people.**
